## Foundations in Immersive Learning Research and Theory

---

From Abstract to Concrete: How Immersive Virtual Reality (VR) Technology Enhances Teaching of Complex Paradigms	1
Using Virtual Reality to Drive Social Inclusion for Children on the Autism Spectrum in West Africa	4
Measuring Multimodal Data in an XR-Based Training Simulation Environment	8
Designing Interactive Space for the XR Boardgame	12
The Role of Virtual Reality in Distance Learning: An Examination of the Efficacy on Student Learning Outcomes, Social Presence, and Collaborative Learning.	17
Teachers' integration of Immersive Virtual Reality in Enhancing Mathematics Competence among High School Students in an Online Learning Environment: A Narrative Review	21
Knowledge Sharing and Networking Event on Immersive Education	26
A Constellation of Potential: Tapping into the iLRN Community to Connect and Collaborate	28
Learning Deliberately: Walden, a Game-Based Curriculum	30
Technical Considerations for Designing and Implementing Immersive Learning Applications	33
Truth with Hope: Teaching the SDGs through Immersive Learning	36
Enhancing Online Graduate Education Experience Using Immersive Learning Environments	41

## Galleries, Libraries, Archives and Museums (GLAM)

---

Open Doors to the Arts: Community-Engaged Immersive Learning for Students with Disabilities	45
Action Research on Exploring the Educational Use of VR Platform in Art Education	48

## Inclusion, Diversity, Equity, Access, and Social Justice (IDEAS)

---

Immersive Learning and Inclusivity: Raising Awareness, Identifying Opportunities and Challenges, and Adapting Practice	53
Creating and Understanding Individualized Real-time Analytic Data using AI for Student Academic Success while Reducing bias in a Virtual Classroom Environment	57
"Mujer Aumentada" (Augmented Woman): Promoting Participation in Augmented Reality through Learning and Innovation	61

## STEM Education

---

Virtual Reality and Anatomy: Increasing Motivation and Learning Gains	64
MarineXR: Comparing the Impact of Two Different Ocean AR Experiences on Student Motivation and Engagement	67
Independently Supporting Learners in VR with an AI-enabled Non-Player Character (NPC)	69

Transforming and Personalising Learning with Immersive Technologies 74

## **Medical & Healthcare Education (MHE)**

---

Evaluation for Iteration; Pre-pilot Design and Results of an Anatomy Education VR Resource. 76

Six Power Steps: Implementing a Neurolinguistic Programming Technique in a Virtual Reality Game to Reduce Anxiety among University Students 84

Empathetic Chatbot: Enhancing Medical Education with Artificial Intelligence 86

It's Snazzy, but is it Useful? Practitioner's Views on Meaningful Use Cases for Healthcare XR 91

Augmented Reality in Higher Education: A Case Study in Medical Education 95

## **Nature & Environmental Sciences (NES)**

---

Mystery of the Lehigh Gap: Summary of the Visual Aspects Designed and Developed for the Dialogue System for Desktop VR Game 99

Applying Virtual Reality (VR) for Immersive Experiential Learning in Underserved Rural Schools 103

## **Workforce Development & Industry Training (WDIT)**

---

Beautiful Mind: A Virtual Reality Game Prototype for Adults with ADHD 106

Immersive Technology-Enhanced Learning System Design in Civil Engineering Education 109

Gamification System Design for Promoting Heterophily in Accounting Education 112

## **Self and Co-regulated Learning with Immersive Learning Environments (SCILE)**

---

Analysis of Online Graduate Education in Learning Experience Design Using Immersive Technologies 114

Diving into SDG 14, Life Below Water: A VR Experience for Deeper Understanding 117

## **Special Track 1: Immersive learning across Latin America: state of research, use cases and projects**

---

Implementation of an XR Center in a Higher Education Institution in Brazil: A Case Study 123
